Recent software development graduate with one year of experience as a Front-End Developer and Business Analyst. Skilled in frontend development, UI/UX design, business requirement analysis, data modeling, and problem-solving, with a strong ability to adapt to new technologies and collaborate effectively within teams.

PROFESSIONAL EXPERIENCE

R&D and Full Stack Developer, Hopper solution & education

May 2025 - Sep 2025

- Collected and analyzed business requirements for a **Finance Management SaaS platform**, ensuring clear understanding between stakeholders and the development team.
- Designed **User Stories, Use Cases, Wireframes, database schemas, and ERDs** covering modules such as deposit, saving, smart saving, eKYC, membership, budgeting, online in voice management and roles and permissions (RBAC).
- Created clean and functional user interface designs in Figma to support the development team.
- Performed **manual testing in the UAT** environment to check transactions, data accuracy, and overall system behavior before release.

NhaNgonSaiGon - Freelance Front-End

Jan 2025 - Apr 2025

Tech Stack: HTML, CSS, JavaScript, MongoDB, Swagger

Website: <https://nhangonsaigon.com.vn>

Project Overview:

- Developed an e-commerce platform specializing in real estate listings and property sales in Ho Chi Minh City. The website allows users to browse, filter, and inquire about houses and land projects with detailed descriptions and images.

Key Responsibilities:

- Built responsive, user-friendly interfaces using HTML5, SCSS, and JavaScript, ensuring consistent performance across devices.
- Optimized UI/UX for property browsing, search filters, and inquiry forms to enhance user experience and engagement.

QUALIFICATION AND SKILLS

- Front-End Development:** Strong proficiency in HTML5, CSS3, SCSS, JavaScript (ES6+), and TypeScript. Experienced with React.js, Next.js, Vite, and Nuxt.js frameworks for building responsive, high-performance web applications. Skilled in component-based architecture, state management (Redux, Context API), and RESTful API integration for dynamic, data-driven interfaces.
- Back-End Knowledge:** Familiar with Node.js, Express.js, MongoDB, and MySQL, capable of integrating and testing APIs to ensure smooth front-back communication and reliable data flow.
- Tools & Workflow:** Experienced with Git/GitHub, Postman, Docker, and Agile/Scrum collaboration (Sprint Planning, Review, Retrospective).
- Education:** Software Engineering, GPA: 3.6/4.0 - FPT College, Ho Chi Minh City.

- **Soft skills:** Strong problem-solving and analytical thinking; excellent communication and documentation skills; ability to work collaboratively in cross-functional teams; effective time management and task prioritization under tight deadlines; proactive and self-motivated in continuous learning and improvement.

ACADEMIC PROJECT

Sona Space – Furniture Website

Mar 2025 – Aug 2025

Tech Stack: HTML5, CSS3, TypeScript, RESTful API, React, Vite, SASS, MySQL, Node.js

Team Size: 4

Website: <https://sonaspace.store>

Github: <https://github.com/SONA-SPACE>

Project Overview:

- A furniture business and interior design website that offers customizable design services and showcases room-based product collections. The platform supports product categorization and includes a full-featured admin interface for managing products, categories, orders, and content.

Key Responsibilities:

- Worked as Full-stack Developer, building both responsive front-end interfaces and scalable back-end APIs.
- Designed UI/UX wireframes and prototypes in Figma; implemented front-end with React, Vite, and Bootstrap.
- Acted as Scrum Master (secondary role): organized weekly sprints, assigned tasks, and monitored team progress.
- Defined business requirements, use cases, and data flows for key features.
